perfect; each person's designs are unique. ④ The concept, that we are allowed to experiment and make mistakes, is crucial in the development of self-esteem. ⑤ When individuals acknowledge that they don't have to be perfect, they are better able to accept their perceived flaws and "themselves as a whole."

12) 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Without appropriate emotions—including some caring by each side for the welfare of the other—it may be impossible for people to resolve important conflicts. If your spouse is feeling ignored and unappreciated, an affable, "Do whatever you want, dear," may only make things worse. An exclusive reliance on cold rationality as a means of understanding the world denies us access to important realms of human experience, without which we may be unable to deal with a difference effectively. Emotions give us clues about how we are being treated and what we need. An ignored and unappreciated husband may be less in need of an explanation of why he feels that way than of a weekend with his wife away from work and children.

Unless you have (A)\_\_\_\_\_ for others, the understanding of another person's perceptions and interests will be (B)\_\_\_\_\_.

- | (A)          | (B)         |
|--------------|-------------|
| ① empathy    | inadequate  |
| ② compassion | acceptable  |
| ③ sympathy   | appropriate |
| ④ antipathy  | worthless   |
| ⑤ emotions   | reasonable  |

13) 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?

19) 다음 빈칸에 들어갈 말로 가장 적절한 것은?

A professor had students craft poetry-generating programs. The children would feed the program verbs, adjectives, and nonus, and the computer would combine them into lines of poetry, "MAD WOLF HATES BECAUSE INSANE WOLF SKIPS" or "UGLY MAN LOVES BECAUSE UGLY DOG HATES." The process of trying to get the program to work made students \_\_\_\_\_.

Jenny, a thirteen-year-old girl who had previously earned only mediocre grades, came in one day and announced, "Now I know why we have nonus and verbs." She'd been taught grammar and the parts of speech for years without understanding them. But as Jenny struggled to get the program to work, she realized she had to classify word into categories — all the verbs in one bucket, all the nonus in another— or else the sentences the computer spat out wouldn't make sense. Grammar suddenly became deeply meaningful. This produced another effect: Jenny began getting A's in her language classes.

\*bucket (컴퓨터) 버킷

(직접 접근 기억 장치(DASD)에서의 기억단위

- ① give up computer-based learning
- ② acquire startling insights into language
- ③ learn various verbal and nonverbal skills
- ④ study how to teach English grammar to others

⑤ comprehend a fundamental principle of hacking

20) 다음 글에서 전체 흐름과 관계없는 문장은?

Anne Mangen at the University of Oslo studied the performance of readers of a computer screen compared to readers of paper. Her investigation indicated that reading on a computer screen involves various strategies from browsing to simple word detection. ① Those different strategies together lead to poorer reading comprehension in contrast to reading the same texts on paper. ② And with so many other forms of entertainment available, it's difficult to set aside time for reading these days. ③ Moreover, there is an additional feature of the screen! hypertext. ④ Above all, a hypertext connection is not one that you have made yourself, and it will not necessarily have a place in your own unique conceptual framework. ⑤ Therefore, it may not help you understand and digest what you're reading at your own appropriate pace, and it may even distract you.

Water availability is a major agricultural concern in India, especially for cultivation of rice. Since only 44 percent of the country's agricultural land is irrigated, millions of rice growers must rely on annual monsoons. Over the past 30 years, though, India's farmers have faced challenges as extreme weather events during the monsoon season - including droughts - have become more frequent Water-use plans are one tool being used to help thirsty regions. In 2009, the Indian government began a national watershed management program to promote more efficient water use through education and technical support Another innovation: Substantial progress has been made in developing hybrid rice varieties that grow faster \_\_\_\_\_.

For example, new drought-resistant basmati rice variety matures about 30 days earlier than previous crossbred varieties. Farmers across India are already praising the high-yielding variety.

- ① but mature late
- ② with less grains
- ③ without chemicals
- ④ while using less water
- ⑤ and are more nutritious

Generally the average person's belief about themselves \_\_\_\_\_ . A large majority of the public believe that they are more intelligent and fair-minded, better describers and less prejudiced than the average person. This is as true of the general public as it is of university students and their professors. This set of beliefs is known as the 'Lake Wobegon' effect, after a fictional community in the stories by Garrison Keillor, where all the children are above average. Again, a survey of high school seniors in the USA found that 70 percent thought they had above-average leadership qualities and only 2 percent believed they were below the average. And of university professors, 94 percent thought they were better at their jobs than their average colleague.

- ① is related to what others think
- ② depends on objective standards
- ③ reflects fictions they have read
- ④ is based on their education levels
- ⑤ goes beyond what they really are

A major psychological challenge for scheduling is to make use of proper skepticism, without deflating the passion and motivation of the team. Unlike the creation of a vision document, (A) [which / Where] spirit and optimism about the future must reign, a schedule has to come from the opposite perspective. The numbers that are written down to estimate how long things should take (B) [require / requires] a brutal and honest respect for Murphy's Law ("What can go wrong will go wrong"). Schedules should not reflect what might happen or could happen under optimal conditions. Instead, a good schedule declares what will happen - (C) [despite / though] several important things not going as expected. It's important to have the test/QA team involved in scheduling because they lend a naturally skeptical and critical eye to engineering work.
